If you plan to attend, let us know at “RSVP Now!” on the SPIN website*

www.spinportland.org

(This is important for speakers copying handouts and facilities preparing refreshments!)

Please join Sabine Meyer, MD as she discusses The Difficult Patient, How to Stay Sane When Dealing with Difficult Patients or Families. You are likely to have a transference reaction if you feel irritated every time you deal with a certain patient. The bad news is: Unrecognized, these responses can seriously undermine our sense of well-being, patient care suffers, families complain. The good news: Understanding your own feelings really helps. Managed well, these “difficult” patients can be very rewarding to treat. Join Dr. Meyer for this presentation, centering on how to recognize and manage transference reactions.

Caution: There are limits to this approach!

SPEAKER: Sabine Meyer, MD is a board-certified psychiatrist who earned her medical degree at Heinrich-Heine-Universität in Düsseldorf, Germany. She went on to work in internal and geriatric medicine at Geriatrisches Krankenhaus Elbroich, also in Düsseldorf. Later, she completed her residency in psychiatry at State University of New York Health Science Center in Syracuse, N.Y. Dr. Meyer also earned her Doctorate degree in biotechnology at the State University of New York College of Environmental Science and Technology in Syracuse. Dr. Meyer joined the Tuality Healthcare Center for Geriatric Psychiatry in 2007.
